

“Their personnel are very easy to deal with. It is a pleasure to call TMC! **I have not found anyone who can beat or even come near their pricing.** Their ability is above and beyond and are excellent with **on-time delivery**. The people we deal with and their flexibility working with us is what I like best about their company. **Service and response** are the best things about Technical Manufacturing Corporation. I like the quick turnaround time, the **quality of work** and information on how to be more cost effective. [They] always offer useful feedback and suggestions to improve our needs. **There is no problem that the staff at TMC is not able to resolve, even with very difficult technical situations. The things that I like the best about TMC is their willingness and ability to react quickly to our ever changing requirements.**

The boards look great and [we] will be testing them very soon, weeks ahead of schedule. **I have found an excellent assembly house... their quality is above and beyond, same as with pricing.** They are excellent with **On-time delivery**... I have not found anyone who can beat or even come near their **pricing**. **Your company is very, very responsive as compared to other companies that I've dealt with in the past.** [Their] extensive CEM knowledge and experience has been very apparent in all of [their] correspondence.”

TECHNICAL
MANUFACTURING
CORPORATION

► The [next level] in **contract electronic manufacturing** services

Welcome to Technical Manufacturing Corporation – the preferred contract electronics manufacturer of choice for successful technology based companies around the country for over twenty years.

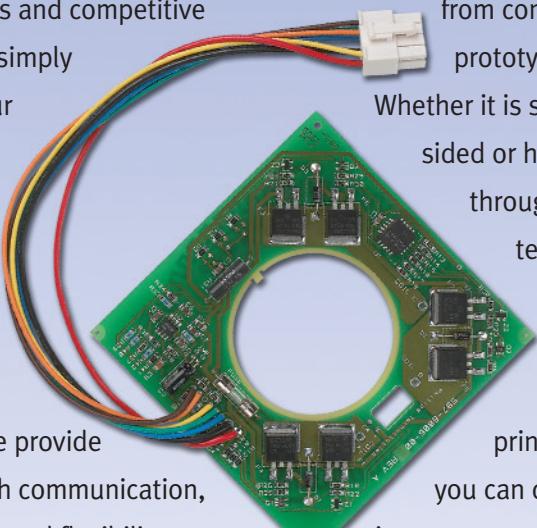

We understand that in competitive and dynamic markets, offering high quality products and competitive prices alone is simply not enough. Our customers require the unparalleled customer service and manufacturing support that we provide to them through communication, responsiveness and flexibility to continually satisfy their rigorous demands and evolving product specifications.

It all happens at our functionally integrated state-of-the-art facility that is fully equipped and staffed with

trained and experienced personnel capable of handling any specification from conceptualization to prototypes to production.

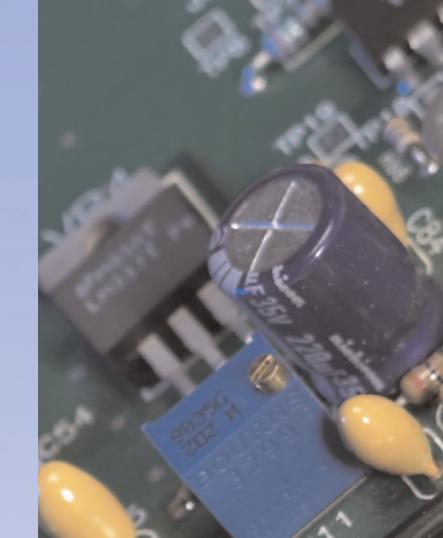

Whether it is single or double sided or has surface mount, through hole or mixed technology components, we can populate virtually any printed circuit board

you can design. On the interconnect products side, we maintain a complete selection of termination equipment for most popular connector manufacturers and can assemble just about any custom wire configuration imaginable from simple ground wires to complex cable harnesses.

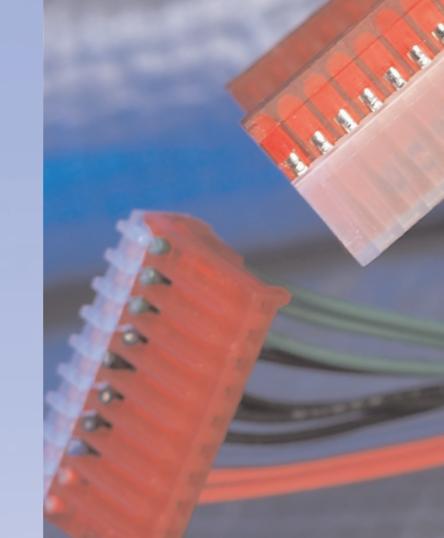

CIRCUIT BOARDS

- ▶ Fully electrostatic discharge safe (ESD) facility
- ▶ Rigid and flexible printed circuit board population
- ▶ Fine pitch component placement from 0201 to ball grid arrays
- ▶ Lead-free soldering available
- ▶ No-clean and water soluble processing available
- ▶ Electrical in-circuit and functional testing
- ▶ EPROM programming, calibration and burn-in capabilities
- ▶ Conformal coating with most popular materials

Our broad electronics manufacturing expertise comes together to provide complete system build services for simple one stop shopping. We'll populate the printed circuit boards, assemble the wires and cable harnesses and build them together to any level of completion from testing to packaging and everything in between including programming, calibration and burn-in. To make it even easier, we can provide finished goods warehousing, order fulfillment and product distribution for ship-to-stock straight into your inventory or drop-ship directly to the end user.

Today, the products that we manufacture for our customers span across all high technology industries and include everything from general consumer electronics to dedicated service and high performance

WIRES & CABLES

- ▶ Underwriters Laboratories (UL) and Canadian Standards Association (CSA) recognized
- ▶ Terminate any wire or cable type including coaxial, ribbon and plastic insulated conductor
- ▶ Assemble simple ground wires to complex interconnecting and multiple termination cable harnesses
- ▶ Process connectors from most popular manufacturers including Amp, Amphenol, Molex and many others
- ▶ Complete line of electrical and mechanical cable assembly testing equipment

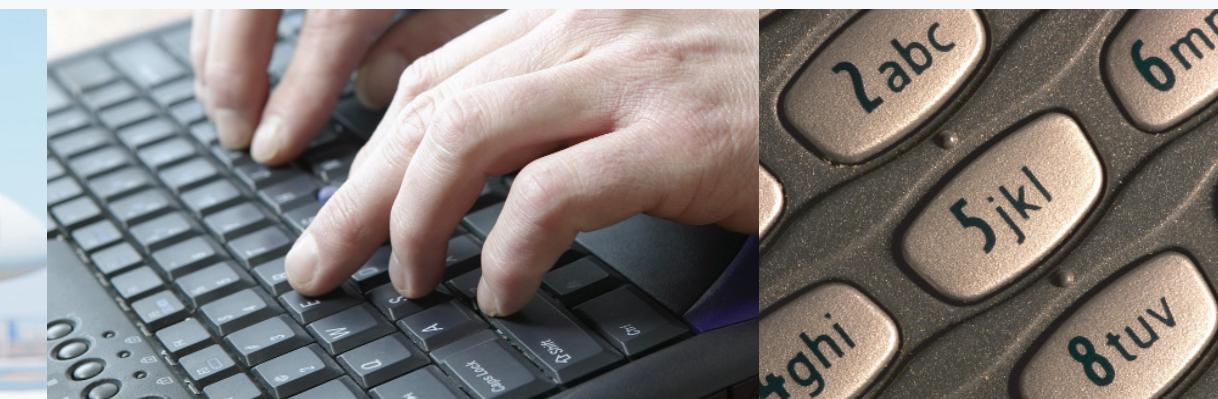

products where reliability and continued performance is critical. They are used in such diverse commercial and military applications that range from staple guns, label printers, video slot machines, stereo components, motion picture audio recorders, computer graphics imaging cameras, cable jacket spark testers, fiber optic routers, high frequency coaxial antennas, tactical fighter planes, submarine sonar arrays and neonatal monitoring equipment to name just a few.

Outsourcing your electronics manufacturing requirements to Technical Manufacturing Corporation can help you to secure a competitive advantage in challenging global markets. Whether you need to save or reduce manufacturing costs, avoid capital equipment investment,

improve time to market, supplement current capacity for demand surges, obtain technical expertise and design assistance or simply to improve product quality, we are ready to provide you with the next level of customer service and manufacturing support you need for your success.

Call us today toll-free at (888) TECH MFG or visit us on the internet at www.techmfgcorp.com for more information on Technical Manufacturing Corporation and our complete line of contract electronics manufacturing services

TELECOMMUNICATIONS ▶ MEDICAL ▶ TEST & MEASUREMENT ▶ COMPUTER HARDWARE ▶ DEFENSE ▶ ENERGY ▶ FACTORY AUTOMATION ▶ AUTOMOTIVE ▶ AEROSPACE ▶ MARINE ▶ SECURITY ▶ OPTICS / PHOTONICS

[Need a quick prototype?] We are more than happy to provide you with free prototypes to any product design for engineering review prior to production. **[Decrease product cost!]** Ask us to perform a complete design-for-manufacture (DFM) review of your product specifications to minimize production costs.
