

FOR IMMEDIATE RELEASE

Vossloh-Schwabe Contracts with the Company for Domestic Production of LED Lighting Modules for the North American Market

Durham, Connecticut – December 2015 – Technical Manufacturing Corporation, a leading supplier of contract electronics manufacturing services to the aerospace and defense industry for mission-critical, high-reliability and harsh environment applications where reliability and continued performance is critical, announced this month that it has contracted with Vossloh-Schwabe in Kamp-Lintfort, Germany to help support production of high intensity LED modules for street and public area lighting for a new product introduction into the North American market. The LED modules are based on high temperature metal core printed circuit board assemblies using high intensity LED components that will be assembled by the company at its manufacturing facility in Connecticut.

The LED modules were designed and developed overseas by Vossloh-Schwabe to enable standard compliant but high efficiency (up to 136 lm/W) lighting in accordance with North American market requirements and are available in IP20 and IP67 versions. The modules range in color temperature including 3000K, 4000K and 5000K and can be configured in various designs (linear and quadratic) and lumen packages from 450 lm to 27,000 lm. They will be used throughout North America in various configurations as street lights, public area lighting and decorative lighting applications.

About Technical Manufacturing Corporation

Technical Manufacturing Corporation is a Connecticut-based contract electronics manufacturing company that has been successfully providing high quality electronics manufacturing services to companies worldwide since 1985. We specialize in building high reliability printed circuit board and circuit card assemblies for our customers, which are used in many different commercial and military applications across all industries including the medical, computer, automotive, aerospace, test & measurement and telecommunications industries.
